## For Smooth and Scratch Resistant Finish

### About Tuff & Shine Coat

Tuff & Shine Coat is transparent water based coat for exterior & interior applications. It is a single coat application for a finished painted surface. It is a two part mixer consisting of resin (part-A) and hardener (part-B). This mixture has to be prepared in 5:1 proportion and has to be applied within 1 hour of it's preparation.

### Advantages of Tuff & Shine coat

- For pencil hard scratch resistance and abrasion resistance.
- Water based clear matt top coat for flexible, yet, total dust resistance and 60% to 70% Gloss.
- For primed concrete, Pu & Epoxy self leveling floor and as top coat to 'INSULTEC'

### Application Method

- Clean the surface thoroughly & make it free from loose dust & oil.
- Wash the surface with water.
- Apply the first coat of TUFF & SHINE COAT by brush or spray.
- If necessary two successive coats.
- Make sure no dust layer is formed between.
- Apply one coat as top coat and 2 coats for longer and better performance.
