REF. NO :

DATE 05/06/96.

Certificate of observation  
to whomsoever this may concern.

During our visit at COMFEX -96 Ahmedabad, on Jan 96., We came to know about INSULTEC Coatings of M/S. INSULTEC PVT. LTD. Ahmedabad. We got INSULTEC applied on our cold storage by their marketing Div. M/S. Weathertuff sales and Marketing on 21/03/96.

From the very first day of it's application we felt drastic difference in surface temp. on the roof. We could walk bare footed, on such coated surface, which otherwise is impossible.

We compared electric energy consumption on unit basis with last year's reading and found as follows.

(MONTH)	1995 (units)	1996 (units)	Units Saved
	<u>Without Insultec</u>	<u>With Insultec</u>	
MARCH	74960	74808 (Full load)	152
APRIL	75864	59516 (Normal run)	16,348
MAY	61596	49516 (Normal run)	12,080

Above observation fully justified application of INSULTEC as claimed by the manufacturer. Also we have observed that after INSULTEC coatings we will not need any other water proofing treatment which we normally have to get it done, periodically.

In short, we are totally satisfied with INSULTEC Coatings for its both protective performance as claimed, being solar heat insulation and waterproofing. Thereby, we have saved costly electricity used on refrigeration. We strongly recommend use of INSULTEC on all similar applications.

With regards and good luck.
