

# PAVER BLOCK HARDENER

Home / Products / Paver Block Hardener

## Description

Accelerating admixture is used for unreinforced concrete and for early dry strength. It Hardens the concrete or mortar faster than normal condition. Gives early strength that enables earlier release of precast concrete.

## Features

Low cost and highly workable for low temperature condition

Improves concrete flow and makes mixture homogenous

## Advantages

Reduces Drying time  
High density and high compressive strength

Makes paver block crack free

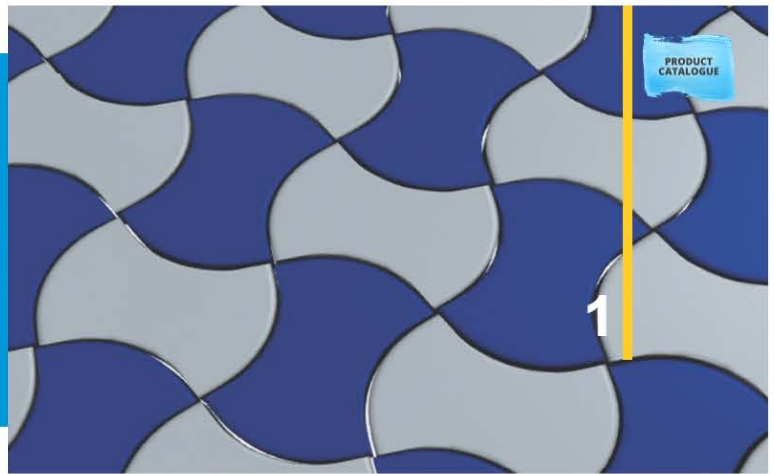

## How To Apply

There are two different procedures for different type of weather conditions.

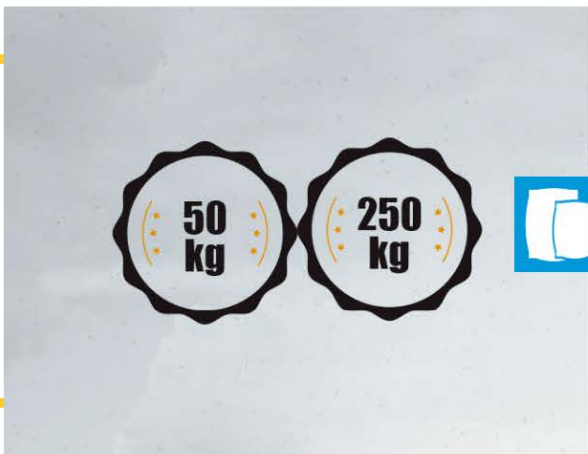

**Temperature below 15 C :** 0.7 to 0.8 Kg of Quick Cure to be use in per 50 Kg of cement bag.

**Temperature above 15 C :** 0.3 to 0.4 Kg of Quick Cure to be use in per 50 Kg of cement bag.

**NOTE :-** Paver Block Hardener is compatible with all types of cement except high alumina or sulphate resistant cements.

## Available Packing

50 Kg & 250 Kg Drum
